

# Mailing Services

## Delivering peace of mind on time, every time

Whether you have a single location or a national organization, if you need custom versions or large quantities of a specific document, our customized fulfillment solutions enable you to respond to ever-changing market requirements. Our state-of-the-art secure facility features over 100,000 square feet centrally located in Denver, Colorado that is designed to house both our produced materials as well as items provided by third parties. When you choose us, you'll never again worry about inventory accuracy or the timely arrival of your materials. We promise predictable management of your products and the flexibility to do it your way.

### Mailing Services

#### Mailing services that consolidate all of your needs

We provide a full range of mail services under one roof. Our many years of experience and technology provide you the peace-of-mind to know that you can count on us to deliver your message on time, every time with efficiency and ease.

What we offer:

- > **Knowledgeable Mail Experts** are here to advise you every step of the way to ensure you are meeting postal requirements and using the best delivery service to reduce postal rates and save money.
- > **List broker department** that specialize in targeted lists.
- > **Crisp clean Ink Jet address** imprinting capabilities offering unlimited font choices and precision printing that meets all USPS requirements.
- > **Full finishing department** that can meet any unique inserting and finishing challenges.
- > **Address Standardization** ensures that your addresses meet the UPSP format requirements. Using addresses that are formatted incorrectly can cause delays in delivery or undelivered mail, which can lead to losing customers and revenues.
- > **National Change of Address (NCOA)** fact checking helps reduce returned mail and increase speed to market by matching your address data to the change of addresses stored in the **NCOA** database.
- > **Coding Accuracy Support System (CASS)** checks addresses before you mail by matching your addresses to the USPS database to correct and improve the accuracy of the five-digit code, resulting in reduced postage costs.
- > **Presorting services** that sort and bundle your mail by ZIP codes to meet USPS processing requirements.
